

Time Loop (TLOOP) — Whitepaper

Token Name: Time Loop

Ticker: TLOOP

Network: Solana

Type: Utility Token

Introduction

Time Loop (\$TLOOP) is a next-generation utility token built to power AI-driven automation and yield-generating strategies within the String Metaverse. It is designed to reward users for the time their AI Agents spend generating value—whether through trading, task automation, or gameplay.

TLOOP represents **time as a digital asset**, allowing users to harness time spent online into tangible rewards.

Vision

“Accelerate value creation by tokenizing time, growth, and automation.”

Use Cases

- **AI Agents Activation:** Use \$TLOOP to rent or upgrade AI agents for trading, gaming, or productivity.
- **Staking & Yield:** Stake TLOOP to earn passive rewards as agents operate on your behalf.
- **Exclusive Features:** Access premium automation tools, time-based boosters, and productivity vaults.

- **Ecosystem Incentives:** Earn TLOOP by completing missions, referring users, or contributing data.
-

Token Utility

Feature	Utility of \$TLOOP
AI Agent Rentals	Power agents for limited time tasks or cycles
Yield Amplification	Use TLOOP to unlock higher APY in String Treasury
Productivity Boosters	Purchase time-bound boosters to fast-track outcomes
Governance (Future Phase)	Participate in protocol upgrades and system changes

Tokenomics (*Preliminary*)

- **Total Supply:** 1,000,000,000 \$TLOOP
 - **Initial Circulation:** 100,000,000
 - **Distribution:**
 - 25% Treasury & Staking Rewards
 - 20% Ecosystem & Community Incentives
 - 20% Team & Advisors (2-year vesting)
 - 15% Strategic Investors
 - 10% AI R&D Reserve
 - 10% Liquidity & DEX
-

Conclusion

Time Loop (TLOOP) redefines how time and automation are valued. As the backbone of String Metaverse's AI-powered ecosystem, \$TLOOP enables a future where intelligent agents, powered by time itself, drive real economic value.
